WHY ADD-ON HEALTH CHECK TO AEP?

Organizations, applications, infrastructure, operations – they're always changing. The security industry and threat perspective continuously evolves. Administrators change configurations and update software, inadvertently exposing themselves to malware. The Comodo Cybersecurity Health Check includes assessing configurations, suggesting ongoing updates and adjustments, ensuring our 100% protection is operating at its optimum level.

A cybersecurity Health Check today will protect your organization from tomorrow's threats.

HOW WE ENSURE SUCCESS

Our approach is simple: implement best practices, test and expand. Our consultants’ are completely (100%) dedicated to optimizing endpoint security 24x7x365.
