Company Overview
CONDYN is an internationally recognized risk and compliance solutions provider.

Based in Centurion in South Africa, CONDYN provides solution-driven technologies that protect organizations from both internal and external threats and vulnerabilities. The company is a firm believer in providing solutions that are tailored to the unique requirements of the client. CONDYN fulfills this promise by partnering with like-minded organizations.

The strategic partnerships of CONDYN ultimately benefit its clients who are able to take advantage of professional services like POPI/GDPR compliance, ISO27001 implementation/audits, Project Management, and many more.

CONDYN takes pride in offering superior risk and compliance solutions to both governments and the corporate sector in Sub-Saharan Africa. “Our mission is to stop fraud and corruption in its tracks while, at the same time, protect organizations and individuals alike against the outside threat,” says Jorina van Rensburg, the Managing Director at Condyn. “This will result in a sustainable harmonious environment for the Africa continent and its people.”

Their Challenge
CONDYN is a risk and compliance solutions provider with an outstanding reputation in the regions it serves. To maintain this reputation, the company focuses on providing its clients with technologies that protect them from both internal and external threats and vulnerabilities.

“CONDYN is focused on providing technologies that protect organizations from outside and inside threats. Our approach is to find solutions that are comprehensive and address our clients’ needs. “Silo solutions are expensive and often lead to security “gaps” due to integration challenges,” says Jorina van Rensburg, Managing Director, CONDYN.

According to Rensburng, a lot of the workforce is currently working from home. This makes comprehensive solutions that will cater to the workforce working from home as well as the endpoint security at home essential. And that is exactly why CONDYN uses Comodo.
The Solution

CONDYN partnered with Comodo to expand its security services offering. Comodo displaced the incumbent, Bitdefender.

CONDYN chose Comodo’s Dragon platform with Advanced Endpoint Protection (AEP) which is a complete cloud-native framework that delivers a zero-trust architecture to protect & defend endpoints. Its patent-pending auto containment technology has active breach protection that neutralizes ransomware, malware and cyber-attacks.

“CONDYN strongly believes in several criteria that need to be adhered to in the value chain, including an open and transparent relationship, "says Rensburg, "Value chain models must support local partners with ease of use and at the right price. Comodo fits our criteria with its cutting-edge auto containment solution that verifies 100% of unknown executables to prevent damage, includes strong support and a good understanding of MSPs and turnaround times, backed by guarantees on the offerings."

Comodo’s AEP utilizes a Default Deny platform to provide complete protection against zero-day threats, while having no impact on end-user experience or workflows. CONDYN also chose Comodo’s Secure Internet Gateway, which protects against web threats and regulates web browsing activities for users in any location, on any device, with full visibility.

Today, CONDYN is benefiting from Comodo’s cost effective, secure MSP platform for customers and partners. It allows CONDYN and its clients to receive solutions that are customized to fit their requirements.
